SUMMARY

Full-stack software developer and startup founder with hands-on experience building production web applications, SaaS platforms, and automated test suites across government, enterprise, and client-facing projects. Skilled across Angular, React, Node.js, and Flask, with a track record of leading technical projects end-to-end — from client requirements through deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS

Frontend: Angular, React.js, Tailwind CSS

Backend: Node.js, Flask, REST API Design

Databases: PostgreSQL

Testing: Playwright (end-to-end automated testing)

Tools & Platforms: Git, GitHub, VS Code, Linux

EXPERIENCE

Frontend Developer (Angular) — Obra Sabonay Technologies

Oct 2025 – Present

Remote — Kumasi, Ghana

- Develop and maintain Angular-based web applications, building reusable components and services aligned with Angular best practices.
- Optimize frontend performance and responsiveness across devices to improve load times and user experience.
- Implement end-to-end automated test suites using Playwright, expanding coverage of critical user flows and reducing regressions before release.
- Work within Git-based workflows alongside backend and design teams to ship features on schedule.

Founder & Technical Lead — Declek Technologies (Part-time)

Oct 2025 – Present

Remote — Accra, Ghana

- Founded and lead a software development studio delivering custom websites, mobile apps, desktop software, and cloud hosting solutions for businesses in Ghana and beyond.
- [Africlass](#) — built a SaaS school operating system covering admissions, attendance, academic results, fee collection, and parent-teacher communication, with a real-time dashboard for school administrators.
- [Declek Shop](#) — built an intensive SaaS shop management system for inventory, sales, and business operations.
- Own the full project lifecycle for client engagements — requirements gathering, technical architecture, development, deployment, and ongoing support.
- Assemble and direct small development teams, overseeing code quality, delivery timelines, and client communication.

App Developer Intern — Parliament of Ghana

Oct 2024 – Dec 2024

Onsite — Accra, Ghana

- Designed and developed dynamic, responsive web applications using HTML, CSS, and JavaScript.
- Built features for a credit union and banking platform system using the Flask framework.
- Provided first-line technical support to staff, resolving hardware and software issues.

IT Support Intern — Electricity Company of Ghana

Oct 2023 – Dec 2023

Onsite — Accra, Ghana

- Troubleshoot system errors, network connectivity issues, and printer malfunctions for staff.
- Installed, configured, and updated software across staff computers.
- Supported users with email, login, and security issues, escalating complex cases when necessary.

PERSONAL PROJECTS

[BookieSpace](#)

Jan 2026

- Developed a comprehensive e-learning ecosystem with dedicated portals for students and educators to manage virtual classrooms.
- Architected an automated exam module and virtual lab simulator, reducing manual grading effort and enabling hands-on technical training.

EDUCATION

B.Sc. Computer Engineering — University of Energy and Natural Resources

2022 – 2025
